

Metric tubing is typically stocked in seamless 304 Stainless Steel and 316 Stainless Steel and is usually in the annealed temper condition manufactured to OD and wall dimensions. Metric tubing is generally used with standard metric compression fittings and other commercial applications that require corrosion resistance and strength.

The diagram shows a central rectangular box with the text **304 M 01 X .50 SL**. Five vertical lines extend from the box to labels: 'Category' and 'Nominal Wall' above the box, and 'Material', 'Nominal OD', and 'Manufacture Type' below the box.
